For the Road-riding Cyclists: How to Follow Route Markings

YELLOW WEDGE ARROWS:

Pedal-with-Pete road-routes are marked with Arrows painted on the roadway. Follow the YELLOW arrows which are shaped like >, < or ^. Other colors or shapes are NOT for our ride, and there are LOTS of them out there!

TURNS: TWO ARROWS BEFORE TURN, ONE ARROW AFTER:

You will find at least two arrows painted on the road before every turn, one about 30 yards before the turn and another close to the turn. After you turn, there will be a straight arrow, ^, confirming you are on the route.

STRAIGHT: ONE ARROW: ^

At intersections where you are to continue straight, there will be at least ONE arrow, ^, near the corner indicating that you should go straight.

IF NO ARROW, YOU'RE OFF THE ROUTE:

If you come to an intersection and there is NO route marking, then you probably missed an arrow and you are OFF THE ROUTE. Pull safely off the road; get out your map to determine how to get back on course. Call us using the numbers on your map, or ask people who live in the area for help.

ROUTE--SPLIT POINTS MARKED WITH ENDING DISTANCES:

We offer 7 routes, and they overlap with one another. Therefore, there will be points where there are two directions to choose from. *Most organized rides don't do this, but Pedal-with-Pete places up-right signs along the side of the road will give warning that the **Route Splits Ahead**.* Just past those signs, the alternative arrows will be marked on the road with the ending mileage for that route. For example, at Hayden Run and Carters Mill Rd, the number 18 will be marked next to the straight arrow on Hayden Run, and the note "ALL OTHERS" will be marked next to the arrow showing a right on Carters Mill Rd. Follow the arrow corresponding to the final route distance you want. So, for Pedal-with-Pete, slow down when you see a 'Route Splits Ahead' sign, carefully choose which of the two alternative arrows on the road to follow, signal your turn, and be safe.

For Bike-path-only Cyclists, For Walkers: Up-right signs (no paint)
